Pehchaan - Digital Identity & Trust Management

Today's digital ecosystem relies heavily on identity systems for accessing essential services such as:

- Healthcare portals
- Agricultural subsidy platforms
- Smart city utilities and citizen services

Need of the Hour

Selective data sharing

Strong authentication

Full user consent and visibility

Ideation & Approach

Core Idea

- Completely privacy-centric, designed for government & public services, controlled fully by the citizen

What is Pehchaan ?

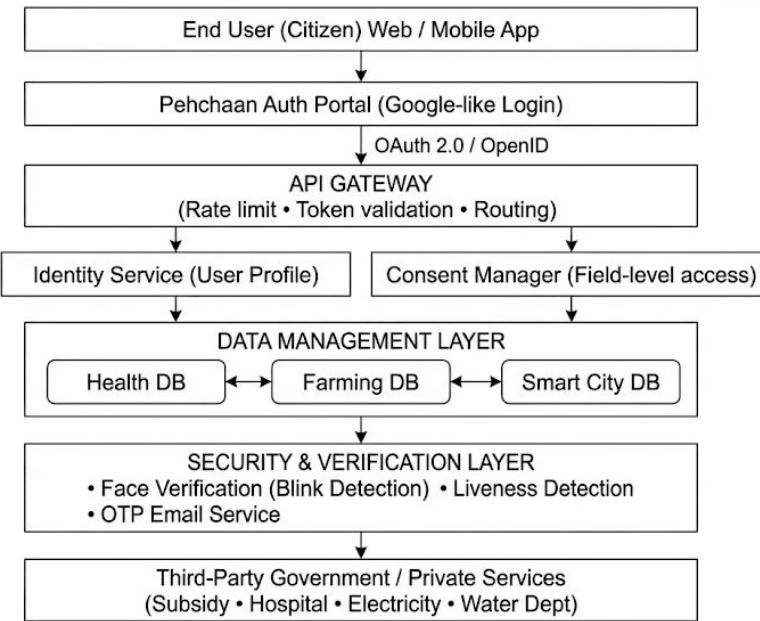

A secure digital identity vault that stores:

- Health records
- Farming & land data
- Smart city bills and services

What we made ?

- JWT Token based access
- Revoke access of tokens
- Face authentication for various platforms with motion check
- Clean & understandable UI

Workflow

Code Snippet - Face Capture

```
1 const capturePhoto = () => {  
2   if (photos.length >= 3) return;  
3  
4   const canvas = canvasRef.current;  
5   const video = videoRef.current;  
6  
7  
8   canvas.width = video.videoWidth;  
9   canvas.height = video.videoHeight;  
10  
11  
12  
13   canvas.getContext("2d").drawImage(video, 0, 0);  
14   const img = canvas.toDataURL("image/jpeg");  
15  
16  
17   setPhotos([...photos, img]);  
18 };
```

Technology Stack

Security Highlights

- Hashed credentials
- Encrypted face embeddings
- ONNX Model

USER CENTRIC SECURITY

Privacy-Centric Digital Identity Platform

Secure, user-controlled digital identity infrastructure for healthcare, agriculture, and smart city services.

Get Started

A white rounded rectangle contains a woman with dark hair, wearing a beige jumpsuit, standing and holding a pink smartphone. A dashed arrow points from her phone to a circular interface on the screen showing a green profile picture of a person with short hair. To the left of this interface is a green circle with a white checkmark. The background of the landing page is a light beige color.

Future Scope - Project

- Blockchain-based consent ledger
- Decentralized identity (DID)
- Mobile app integration

What is progress from last submission ?

- Enhanced user interface (frontend improvements)
- Implementation of external website authentication
- Fully operational website

**Thank
You**
